From cross-scans and telemetry to supervised samples
868 audited cross-scans
Coordinates, receiver, control state
Thermal telemetry
295 channels on a 2-minute grid
Exclude 3 active-offset events
865 target candidates
60 x 295 history windows
Grid, finite-value and jump checks
197 thermal-window rejections
668 retained labelled events
Train: 400
Validation: 133
Historical test: 135
Chronological split precedes fitting statistical transformations.
Online use additionally requires an as-of timestamp-availability audit.
